Dynamic Website

Our Vision

The project will have Great look and feel with great User friendliness and navigation system, The website will be search engine friendly to gain better promotion aspects at search engines.

Visitor Module:

1) Homepage design: Complete Home Page Layout, inclusive of basic designing with easier navigation so that one can have the complete synopsis of the site from the home page itself.

Home Page Layout will consist of user-friendly interfaces, inclusive of:

- ✓ Impressive Home page Designing with Flash Header .
 - ✓ Good navigation featuring vital links to ensure maximum comfort and User-friendliness to the visitor
- 2) Contact us :** Will have all contact details with one end query form which will be sent to your email Id and tracked in admin panel.
 - 3) Manage Pages (CMS -Content Management Tool):** All the informative pages will be manageable from the admin panel, admin can add/edit/delete the content of the pages at any point of time.
 - 4) Dynamic Category Section:** In this section Admin of the Website will be able to add edit delete n number of Categories like sound,equipments and many more . So if in future you launch a new range , you will be able to update your website yourself. Also under categories you will be able to add sub-categories .
 - 5) Dynamic Product Section:** In this section Admin of the Website will be able to add edit delete n number of products under these categories and sub-categories.

On Website : Visitors can simply look at all categories created by Admin , clicking upon them they can get in to products uploaded by you, From there, They can click any of the product and get the details about the same.

Final Products Presentation :: Clicking upon a particular product visitor will be able to view the complete description of that products. Along with its..

- Product Name
- Code
- Price(optional)

- 4 Thumb Images for the products
- Product Specification
- Enquiry form
- Refer to friend

Dynamic Photo Gallery product section :-

Dynamic Photo gallery section where functionality of website work like you just need to put image or Embed code at back-end section of the website and image will be on website front. Similarly this functionality allow you to add unlimited images in to the website.

Time Line Of The Project :-

Home Page Designing :- 2 Working Days After Making Advance Payment

Inside Pages Designing :- 5-6 Working Days

Beta Version/Programming Phase Of Website :- 8-10 Working Days
